

ALEXA JAVELLANA

SUMMARY

A Software Engineer and creative professional with over 6 years of experience building interactive and diverse software and platforms for private and public organizations. With expertise in bridging the gap between technical complexity and design, I have brought projects to life for companies around the world.

EXPERIENCE

Front End Engineer - Amazon

Seattle, WA (06/22 - 04/26)

Launched interactive features and digital initiatives for Amazon Prime Video with JavaScript, TypeScript, Java, Kotlin, Figma, Git, Webpack, AWS in collaboration with UI/UX, Product, and Backend teams

Led development for software tools that targeted internal stakeholder pain points, reducing timely manual intervention by over 90% for over 5,000 advertised Prime Video events weekly

Improved metadata quality for live-streamed sports, music and playback events on Prime, integrating new workflows and component libraries that addressed search rankings, localizing event information, image quality, etc.

Maintained a broad range of responsibilities cross-team, including dependency and package management, environment driven testing, design library maintenance, and maintaining and sharing best practices

Digital Consultant - Liferay Tokyo

Tokyo, Japan (12/19 - 08/21)

Operated as the primary technical Consultant for front end related development for Liferay's ASEAN client portfolio

Built and designed platform solutions for the Japanese military, commerce companies, public institutions with React, TypeScript, HTML/SCSS, JavaScript, Figma, Git, JSP

Presented outcomes to stakeholders in Japanese and English, documented best coding practices for knowledge share, maintained design systems for each client project

EDUCATION

Marist College, 2019

Bachelor's of Science in
Computer Science

Temple University

Tokyo, Japan, 2017

SKILLS

JavaScript, TypeScript, React, HTML/SCSS, Java, Kotlin, Python, AWS (Pipelines, Lambda, API, etc.), AngularJS, Next.js, jQuery, Redux, Figma, Tailwind, Affinity, Adobe Photoshop, Illustrator, UI/UX, Supabase, Postgres, SQL, Cross team collaboration, Front end development, CMS and E-commerce integrations, Wordpress, Netlify, Git, Webpack, npm, D3.js, Responsive design, CI/CD

English, Japanese

RELATED WORK

Front End Engineer

Built interactive web features in React, JS, HTML, Figma for marvel.com

Applications Developer

Developed an internal financial portal for IBM with Angular, Next.js, Python

Disney, Marvel (01/19 - 06/19)

IBM (05/18 - 09/18)
