

ALEXA JAVELLANA

ajavellana123@gmail.com

Hello and welcome! My name is Alexa, and I am a Digital Design and Development Consultant with experience as a Front End Engineer in the USA and Japan for over 6 years and counting. I pride myself on my ability to bring life to beautiful ideas on any platform in the digital world.

Hoshi Pilot @hoshipilot

Skills / Tools Used: Adobe Photoshop and Illustrator, Instagram, Web development, E-commerce management, Packaging design, Digital and illustrative design

Currently, I am directing and developing the digital presence of an e-commerce brand. I produce vectorized illustrations for reproduction on physical print media to campaign for product releases.

Many of the illustrations are experimental designs that revolve around colorful graphics inspired by the early 2000s. Products offered through this brand range from press-on nails and stationery items.

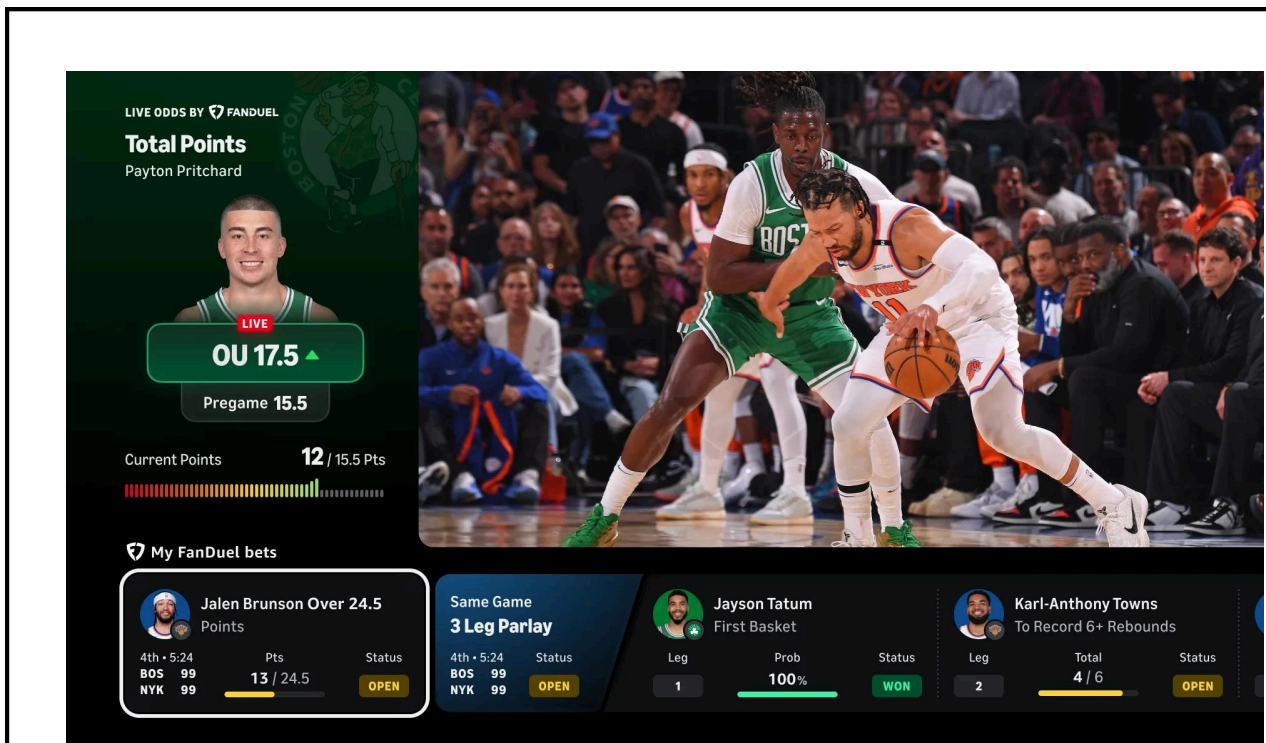

Amazon Prime Video Live Sports and Media

Skills / Tools Used: JavaScript, React, Kotlin, Figma, AWS, Web-based development, design and management, Responsive design, Multimedia screen design {adaptable front ends for television and mobile}

For four years, I worked at Amazon as a Front End Engineer creating websites, features and software tools to improve viewership across Prime Video supported devices internationally for 3.1 millions of viewers and counting.

As a leading front end subject matter expert. I worked daily with user experience designers and product teams to deliver aesthetically efficient and brand centric features on all types of screens, from mobile to desktop.

[001] Exhibit A: One of the many examples of an interface I developed and published on Prime Video

Liferay, Tokyo Consulting Front End

Skills / Tools Used: Front end consultation and client based collaboration, Figma, HTML/CSS, Web development, Brand identity management

For two years, I was a client-facing Consultant for Liferay Tokyo. I helped consult on e-commerce websites, college information webpages, and government/multinational corporation document and booking system handling platforms, presenting in both Japanese and English.

I helped coordinate design and development for websites using Figma, HTML/SCSS, JavaScript, the Liferay CMS, GraphQL and REST APIs for clientele in Asia and Australia. These ranged from projects for companies and organizations in the government, public education, and private corporations.

What types of clients did I help?

E-commerce for home goods online retailer in Australia

Booking management system for a part of the Japanese government

Internal management system for a Japanese national postal service

Product catalog platform development for a Japanese machinery company
